 Leetcode: leetcode.com/u/ujjwal9999  Portfolio: frozen-jolie-soulu-fd828593.koyeb.app

Summary

- **AI Automation Engineer** with expertise in **LLMs, NLP, and predictive modeling** using **Python, TensorFlow, and PyTorch**. Skilled in **statistical analysis, and model optimization** to drive AI-powered solutions. Passionate about building scalable AI/ML systems integrated with real-world applications.

Skills

Programming Languages & ML Tools: Python, XML, JavaScript , SQL , TensorFlow, PyTorch, Scikit-learn, Hugging Face

LLMs & Frameworks: Flask & Frappe, RabbitMQ, Langchain,GPT, LLaMA

IoT & Cloud: AWS, Bluetooth, GPS, RFID

Agile , DevOps & Deployment: JIRA , Podman, Github, Postman

Soft Skills: Teamwork , Negotiation skills, Communication , attention to detail

Work Experience

Acuity knowledge partners, AI & DS engineer  March 2025 | bengaluru
Building LLM-based pipelines for PDF data extraction and structured mapping using AWS Step Functions, S3, and Podman. Automated ML workflows for scalable document processing.

SOUL Limited, AI Developer  January 2024 – February 2025 | Odisha

- Developed AI-powered healthcare apps using Flask, IoT, **text analytics models** and **NLP**, reducing data retrieval time by 30% and increasing patient engagement by 25% .
- Optimized IoT-enabled ML workflows by integrating **edge inference** reducing system latency by 50% .
- Developed an **AI-powered** Asset Tracking System integrating RFID reducing asset loss by 99%.

Johnson Controls, Intern  January 2023 – October 2023 | Pune

- Contributed to the XAAP mobile app, engineered WebSocket-based **AI-driven fire safety predictions**, reducing response time by 40% and increasing alert accuracy by 25%.
- Developed a data augmentation based web app for fire panel safety systems in 15 days, demonstrating rapid prototyping.

Highradius Corp., Intern  January 2022 – May 2022 | Karnataka

- Contributed to Alzheimer's research using **Convolutional Neural Networking** with 5 teams.
- **Analyzed datasets** with unsupervised learning, achieving 85% model prediction accuracy.

Education

MBA (Information Technology) **8.8 cgpa**, Uttarakhand University  2024 – present | Dehradun

B.Tech (CSE) **8.78 cgpa**, Kalinga Institute of Industrial Technology  2019 – 2023 | Odisha

Projects

Artificial Consultants for Healthcare and Legal issues  August 2024 – October 2024
Built an AI-driven **RAG** based NLP system for medical diagnostics and legal case analysis, providing **AI-backed** recommendations using deep learning and predictive analytics.

Master System Integration  August 2024
Developed an AI-driven **data processing system** for **ECG diagnostics, nursing calls, and hospital automation** using **ML models**.

QR Data Fetching And AI Consultation  December 2023
Developed an AI-powered QR scanner using **OpenCV, Tesseract OCR, NumPy and FastAPI**, achieving 98% accuracy in Aadhaar data extraction.

Certificates

Certified in Problem Solving and Node.js  | Google Cloud Application Infrastructure Modernization  |
The Role of Global Capital Markets & Lessons for Investors  | AI & ML for Business Transformation 

Achievements / Activities
